

Component Health Scores

Detected Issues

Recommendations

- **Engine health** is below optimal. Schedule a full engine diagnostic immediately.
- **Fuel system efficiency** is low. Check injectors and O2 sensors.
- **Thermal stress** is high. Inspect cooling system and coolant levels.

- ■ Driving pattern is aggressive. Reduce rapid acceleration and hard braking.
- ■ Engine efficiency is poor. Consider air filter and spark plug inspection.

This report was generated by Vexis AI using 200 OBD readings from your uploaded CSV. Data quality: High. This is an automated ML analysis — consult a certified mechanic for official diagnosis.
