

COMPONENT HEALTH SCORES

DETECTED ISSUES

#	Issue Description	Frequency
1	Engine anomaly detected	82%
2	Fuel system irregularity	55%
3	Thermal stress detected	100%
4	High coolant temperature	100%
5	Aggressive driving patterns	62%

RECOMMENDATIONS

- 1 Engine health is below optimal. Schedule a full engine diagnostic immediately.

- 2

Fuel system efficiency is low. Check fuel injectors and O2 sensors.
- 3

Thermal stress is elevated. Inspect the cooling system and coolant levels.
- 4

Driving pattern shows aggressive inputs. Reduce hard acceleration and braking.
